

FLEET OPERATIONS, SPECIFICATION, MODIFICATION AND STANDARDIZATION

AREA OF RESPONSIBILITY:

Evaluation of DOT equipment productivity to include recommendation for improvement and changes in equipment specifications.

Accumulation and evaluation of information from DOT personnel, field engineers, operations, mechanics, and sales representatives pertaining to equipment operating features that would improve the quality and productivity of our equipment fleet.

Documenting information in reference to repair parts and service availability for equipment being considered for purchase.

Making recommendations for new specifications or for changes to specifications that include areas of warranty, operator and mechanic equipment training, safety, and etc. Assist in preparation of policies and procedures concerning utilization and operation of our rental equipment.

Reviewing ideas and/or recommendations for modifications to improve the safety or operational capabilities of the equipment.
