

NCDOT ROADWAY PUBLIC HEARING MAP

CHAPTER 11: CREATING CEMETERY SHAPE

Navigate to RDY PHM Exist Cemetery Shape Model.

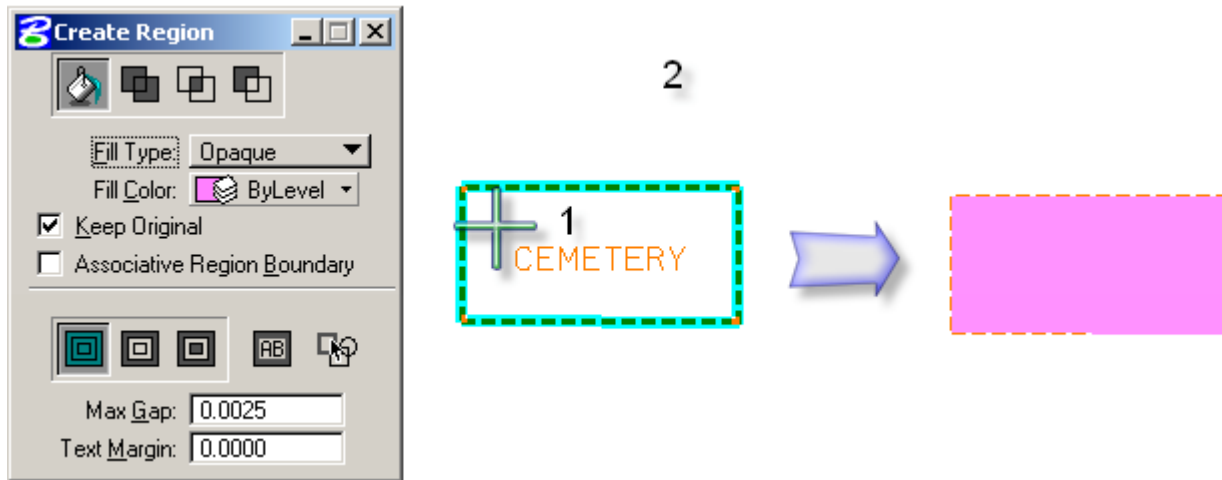

Step 1.

Double click on the **Cemetery Shapes** tool item. Make sure **Place Influence** is checked on.

Step 2.

Data point (1) inside the cemetery area and data point (2) to anywhere on the screen to accept.

Step3.

Last, hatch the cemetery shape with black hatch lines. Click on the Cemetery Black Hatch Lines item and select the cemetery shape to hatch. Distance between hatch lines is determined by Project Scale.
