

NCDOT ROADWAY PUBLIC HEARING MAP

CHAPTER 12: CREATING WATER SHAPE

Navigate to RDY PHM Exist Water Shape Model.

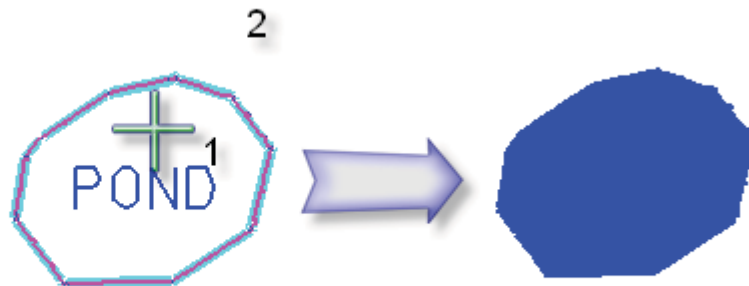

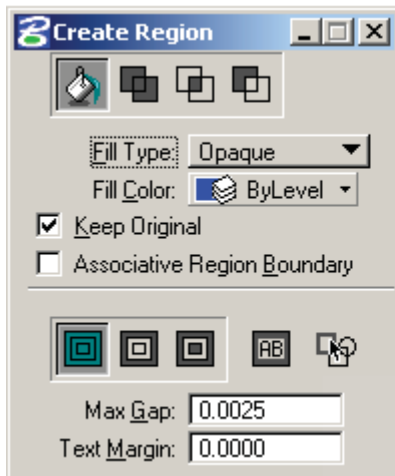

Step 1.

Double click on the **Lakes, Rivers, Streams, and Ponds** tool item. Make sure **Place Influence** is checked on.

Step 2.

Data point (1) inside the water boundary and data point (2) to anywhere on the screen to accept.

It is necessary to close an area before it can be flooded to create a shape.
