

TMSD Work Management System Order Creation Quick Card

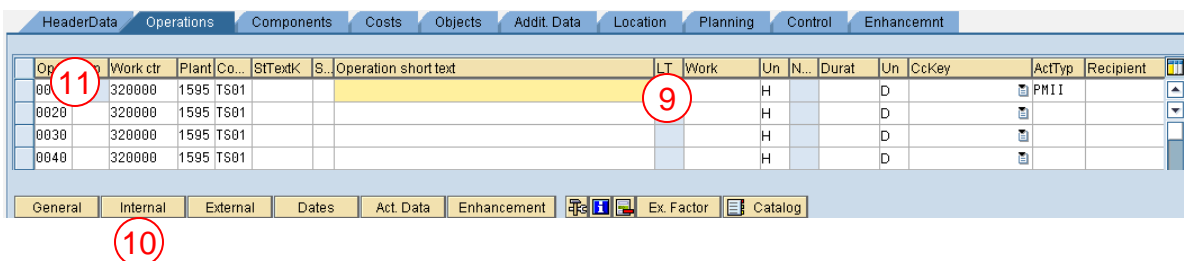

1. If the order is being created through a notification, skip to step 8
2. To create an order by itself, use transaction IW31 (order type = "TS01") and enter the priority (normal or expedite) and functional location (county, division, or statewide), then press "Enter" or select the "Header Data" button

3. Enter the description (remember to start with "2000" or "3000" unless the order is for a TIP project; also remember high order and low order routes)
4. Select a planner group (Unit, Section, or Group responsible for the order)
5. Enter the main work center (actual business unit responsible for the order)
6. Enter a basic start date
7. Enter a basic finish date
8. Select an activity type (order "type" or "categorization")

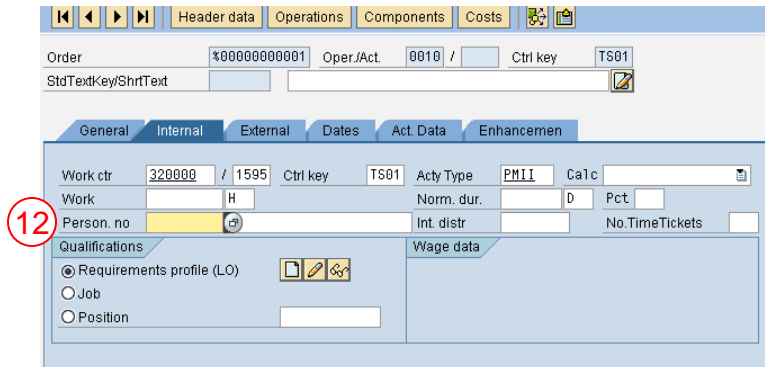

9. Edit/add operations, and any work hours or durations (if applicable)
10. Edit the work center assignment (if different from the default)
11. Click the "Internal" button to assign the operation to an individual employee (if applicable – otherwise, skip to step 13)

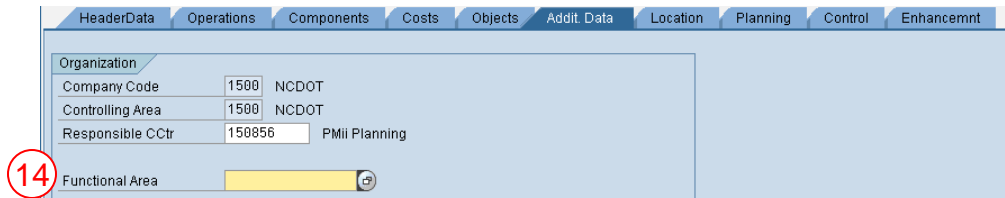

TMSD Work Management System Order Creation Quick Card (continued)

12. Enter the personnel number of the employee responsible for the operation and click the “Back” button ()

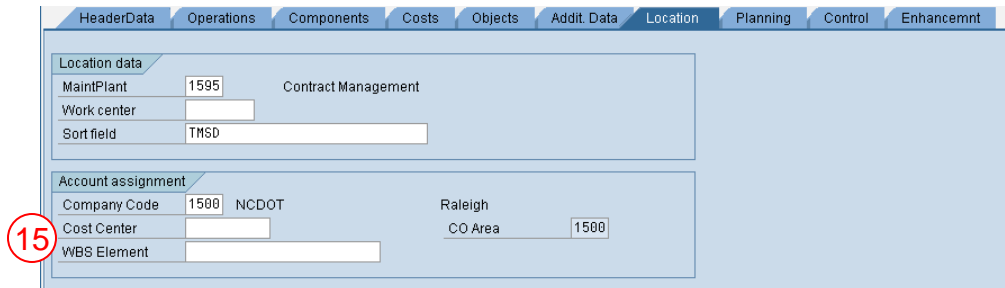

The screenshot shows the SAP Order Creation Quick Card interface. The 'Person no.' field is highlighted in yellow. A red circle with the number 12 is positioned to the left of the field. The interface includes tabs for Header data, Operations, Components, and Costs. The 'Person no.' field is located in the 'Internal' tab under the 'Person' section.

13. Calculate the schedule (if applicable) using the “Schedule” button ()
14. Enter a function area code (if this order is for 3000 series employees)

The screenshot shows the SAP Order Creation Quick Card interface. The 'Functional Area' field is highlighted in yellow. A red circle with the number 14 is positioned to the left of the field. The interface includes tabs for HeaderData, Operations, Components, Costs, Objects, Addit. Data, Location, Planning, Control, and Enhancemnt. The 'Functional Area' field is located in the 'Organization' section.

15. Enter a WBS element (if this order is for 3000 series employees) OR a cost center (if this order is for 2000 series employees)

The screenshot shows the SAP Order Creation Quick Card interface. The 'WBS Element' field is highlighted in yellow. A red circle with the number 15 is positioned to the left of the field. The interface includes tabs for HeaderData, Operations, Components, Costs, Objects, Addit. Data, Location, Planning, Control, and Enhancemnt. The 'WBS Element' field is located in the 'Account assignment' section.

16. Perform the settlement rule () with “default” at 100% full settlement and click the “Back” button ()

Cat	Settlement Receiver	Receiver Short Text	%	Equivalence no.	Sett.	No.
WBS	12345.1.1	Gates, US 158, 01-03-21	100.00		FUL	1
WBS	12345.1.1	Gates, US 158, 01-03-21	100.00		PER	2
